

# Canterbury Architecture Award

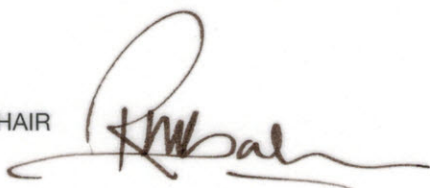

**PRESENTED TO** Sheppard & Rout Architects Ltd in association with Royal Associates Ltd

**CATEGORY** Public Architecture

**FOR** Landscape Architecture Building

The exterior of this contemporary addition to an established campus is in traditional brick, delicately yielded and folded to expose interior spaces. The interior procession of materiality from earth to sky provides an enjoyable experience, the enveloping warmth of brick wall and floor at ground level opening up to lofty spaces above. By arranging the spaces around a common atrium, there is a cohesive, inclusive feel to the individual rooms that help create synergies for students to learn together.
