

New Zealand Architecture Award

PRESENTED TO

Sheppard & Rout Architects Ltd and Royal Associates Ltd in association

CATEGORY

Public Architecture

FOR

Landscape Architecture Building

This intimately scaled addition to Lincoln University provides an inviting connection to the main campus. Contextual sensitivity has helped create a robust building of concrete, brick and timber, with a twist - horizontal concrete bands provide a frame against which brickwork dances, curtain-like. Shifting geometries give an organic quality to the main teaching spaces. The project offers testimony that a miraculous outcome can be delivered on a tight budget.
